Company Profile
Rey & Lenferna Limited is one of the oldest “Engineering” companies in Mauritius. The clients and patrons of Rey & Lenferna range from individual home owners, private organizations to governmental corporations.

Incorporated some 72 years ago, Rey & Lenferna has ever since been involved, during the pre and post Independence Era, in a vast number of building and engineering projects in Mauritius and has actively participated in the build-up of modern Mauritius by offering World Class engineering products and solutions to government institutions, business organizations and industries operating in Mauritius.

Rey & Lenferna holds over 50 exclusive brand representations with major Engineering Equipment manufacturers and primarily deals in Mechanical, Electrical, and Plumbing (MEP) works in partnership with major Civil Engineering Building companies and contractors in Mauritius and has recently been exporting its “savoir faire” to other countries in the region.

The company presently employs about 500 persons out of which 100-150 are highly committed engineers, sales and service staff who support the most stringent request for Mechanical, Electrical, Automation and other Ventilation services. Rey & Lenferna’s value proposition is underpinned by Service Value Addition, from Design to Execution; Implementation/Installation; Commissioning and User Training.

The product strategy of Rey & Lenferna is, in substance, to diversify its activities and markets without changing its core business structure. In fact, more complementary and supplementary value items are being added to its product spectrum targeting different segments of the market.

A good example is Rey & Lenferna’s new array of energy saving products and greener power generation solutions from renewable and cleaner sources of energy in line with the government MID (Maurice Ile Durable) strategy such as the range of solar electric system, also known as photovoltaic or PV system which is not only pollution-free but reliable and highly efficient.

The company’s objective is to provide a ‘one stop shop’ service and turnkey domestic and industrial solutions to its customers thus contributing in the reduction of lead times and cost by consolidating their wish list through one and same supplier.

Moreover, Rey & Lenferna’s sales and technical staff undergo regular training all over the world from USA to Europe and Asia so as to gather and acquire as much knowledge and skills in order to provide and deliver the highest level and standard of service to its clients.

Rey & Lenferna aspire to remain a market leader through solution, innovation and continuous improvement in its core services, while offering quality solution with reliable products of international repute, and strengthening long-term relationships with its clients.

Generating growth through innovation, hard work, service quality and constant adaptation to market demands is the way forward for Rey & Lenferna.
Company’s Overview

Rey & Lenferna Ltd was founded in 1940 with the prime objectives of supplying goods and services to the industry sector in Mauritius. Over the years, the company diversified its activities and today covers a wide range of engineering related fields and with a firm footage in the building sector by providing installation services in Air-conditioning, Electrical, Plumbing-Fire Fighting and Lift and Escalators.

Rey & Lenferna has 4 main divisions:

(a) **Automotive division** comprises of
- the Diesel Diagnostics department which handles diagnostics/ repairs/ maintenance of injection pumps for all vehicles,
- the Battery department which supplies various types of batteries for automobile fleet forklifts, tractors and golf cars besides chargers & testers,
- and the Automotive department which commercialises spare parts and lubricants.

(b) **The Trading division** comprises of 7 departments:
- Air Conditioning Solutions
- Electrical Solutions
- Hotel & Catering Solutions
- Industrial Solutions
- Security & Power Solutions
- Water Solutions
- Generators Solutions

(c) **The Contracting division** which provides installation services to office complex hotels, villas, shopping malls etc. and embodies the following 4 activities:
- Air Conditioning & Ventilation
- Medium, Low & Extra Low Voltage
- Lifts, Escalators & Travellators
- Public Health, Fire Fighting & Turf Irrigation
- Building Management Systems
The Contracting division has also a tendering unit as well as a M&E Drawing unit.

(d) **The Services Division** of Rey & Lenferna providing a 24h/7 after sales service support to all its customers for all the products commercialized.
Trading Division

The Trading Division proposes you with a selected range of products appropriate to your business and individual requirements.

We have secured an array of top quality products, and developed adequate expertise thanks to the long lasting partnerships with our top rated, reputed suppliers.

We propose solutions which will offer peace of mind for B2B and B2C customers. We have re-organized the Trading Division so as to provide you with quality services and have dedicated Product Specialists to look after your specific needs and requirements.

This document is only a brief presentation of our offers. Our team of sales specialists would be pleased to meet you to discuss about your projects at development stage, so that we can recommend the best value for money solution.

The Trading Division’s success also relies on team work: The Service Division whose team are dedicated professionals, guarantee that all the equipments we supply remain in good working condition, thanks to preventive maintenance contracts and 24h/7 emergency response service.
The Department commercializes since 2003, Midea brand split type air conditioning systems such as wall mounted type, ceiling / floor convertible type, ducted type and cassette type for capacities ranging from 9000 to 60000 Btu suiting various domestic and commercial applications. Midea outdoor units are moreover specially treated for our tropical island.

Midea is one of the leading manufacturers of air conditioners and has been able to build quality products at competitive prices. Its compressor manufacturing partnership with Toshiba and its high tech assembly plant in China have been a winning combination. We are excited to represent Midea in Mauritius, a brand which has already gained customer satisfaction in terms of performance and quality.

To be in line with greener technologies, we have the Midea Inverter AC with class A rating enabling up to 70% energy savings (test performed by the chairman of Institute of Refrigeration- Mauritius). Moreover, our New PREMIER model Inverter AC combines better savings (Class A+ rating), new technology (The Intelligent Eye Detector) and comfort (AC with the lowest available noise level of 20dBA).

We can also design and build central type variable refrigerant flow systems (Midea VRV systems) with one outdoor unit and multiple indoor units for medium type air conditioning projects and TRANE chillers for larger type projects.

To complete our offer, we supply Novovent fans & accessories for providing adequate ventilation for kitchen, toilets, warehouses, workshops, etc.

A few recent projects completed by the department are:
- Midea AC for Oasis villas of Leora Appartments
- Midea AC for Business Park Office
- Midea Inverter AC for Police Department
- Midea Inverter Ac for Esplanade, La Mivoie, Bon Espoir, Le Mirage & Beau Mesnil RES Villas
- Midea VRV systems for Simla Way & Sheridan Supermarkets (year 2011 of year 2012)
- Trane Rooftops for cinemas at Grand Baie, La Croisette (year 2012)
- Trane Chillers for Heritage Awali of Prince Maurice Hotels (year 2011 of year 2012)
The Electrical Solutions department is involved in the building sector. We represent a number of famous brands such as Osram, GE, Allen-Bradley, Comar, Fael Luce, Lysaght, 3M, Mennekes, Ferraz-Shawmut, Satec, Crompton, KEI, Eland, IMEB and Zennaro, home automation Bticino, LED lamps Edison- Everlight, Cree.

The department sells the following electrical products either directly to individuals and to companies in various markets (such as sugar, hotels, building contractors, textile & manufacturing industries among others) or through a retail distribution network: energy-saving bulbs, cables and accessories, circuit breakers, isolators, fused switches, fuses, contactors, overload relays, metal and polyester enclosures, motors and accessories, power transformers, lamps, fluorescent tubes, lighting poles, industrial plugs and sockets, meters and CT’s, insulating tapes and carbon brushes.

We are also involved in tailor made panel building. Panels are designed by our engineers, assembled by our workshop to high standards. The panels are mostly for low voltage (400V) applications. The two main types of panels supplied are: motor control (e.g. starters for pumps) and power distribution (e.g. industrial distribution panels).

The department also supplies eco solutions such as led lamps & floodlights, low energy halogen lighting, energy saving lamps and photovoltaic systems. Getting more and more involved with architects and interior designers have helped to develop decorative lighting and electrical solutions.
From the moment you plan a kitchen / food processing project, whether it is a hotel, restaurant, fast food, collectivity, bakery, supermarket, food & seafood industry, you would need to talk to us. We supply turn key solutions, from the kitchen plan & drawings to the full selection, implementation and commissioning of the chosen equipment.

We have a large choice selection of world renowned brands such as Zanussi, Dito-Electrolux, Logiudice, Roller Grill, Primus, Codigel, Unox, Robot Coupe. Our proposed solutions are tailor-made to your requirements & budget.

The Service Division whose team are dedicated professionals guarantee that the equipment we supply remain in good working condition, thanks to preventive maintenance contracts and 24h/7 emergency response service.

Please review our recently completed or current projects.

- Medical & Surgical
- Mauritius Commercial Bank
- Ebene Cyber city (Sheraton)
- Le Cardinal Exclusive Resort
- Angsana Hotel
- Melrose Prison

The Industrial Solutions Department provides products, solutions and services in the fields of engineering for different industries in Mauritius and the region. Starting as a pioneer in supporting the Sugar Industry, the department has, over the years, diversified its activities in other economic sectors such as textile, food & beverages or hotels.

Our main brands are Rockwell Automation, Yokogawa, Avery, Spirax Sarco, Alfa Laval, Rocol, Compair, and Konecranes among many others. Our team of competent, fully trained engineers and salespersons supported by our reputed overseas suppliers so that we can perfectly serve our clients’ needs in terms of specialized products and services.

The department is active in the following areas:
Material Handling and Warehousing – we supply racking, shelving, lift trucks, hoists, cranes, goods lifts – which are the main essential equipment for a warehouse.
Steam and Energy – boilers, burners, burner management system, steam and condensate equipment, pipe insulation – we can offer every products related to steam and energy conservation. Our capability of offering counselling and support for steam products and applications is very well known in the industry.
Fluids – We offer products for fluid handling, storage and conditioning – pumps, pipeline accessories, tanks and accessories, heat exchangers, centrifugals and separators, air compressors, extraction of air etc.
Controls – System components, PLCs, drives, building management systems. Together with our main partner, Rockwell, we offer you a complete range of products for your automation needs.
Measurement – We offer equipment to measure level, temperature, pressure, flow, fluid analysis and weight.
Lubrication – Oils, grease, bearings, lubrication systems, chains, gearboxes etc.
Our focus is to offer quality, reliable and efficient solutions to our customers.

Main past projects
• More than 15 overhead travelling cranes range from 2 T to 20 T.
• Coal/oil/gas fired steam boilers ranging from 1 to 12.5 T/h complete with feed water tanks & flue stacks.
• Steam, condensate, water and air distribution in a livestock feed factory.
• Complete plant automation for livestock feed plant and rice factory.
• Installed base of 75% of market share for instrumentation and controls with plants standardised on Rockwell and Endress & Hauser.
• Installed base of 70% of variable speed drives in Mauritius.
• Special environmental friendly lubrication for sugar mills in Mauritius and Reunion Island.
• Over 15 sugar centrifugal machines in various sugar factories in Mauritius.
• Installed base of 60% of weighbridges in Mauritius from 10 to 60 T.
Automotive, Home & Engineering Solutions since 1940

Company Profile | June 2013

Security & Power Solutions

Created in 2002 as the UPS department, renamed Electronic & UPS department it is now known as the Security Solutions Department.

The department provides turnkey electronic security solutions both to the domestic and commercial markets, from the design to installation with expert's site visit and advice.

Our partnership with HIKVISION, ranked No.1 in Asia, has helped to propose a range of video surveillance solutions ranging from Analog cameras, to network/IP cameras and network/hybrid video recorders. We also provide Video IP Encoders to upgrade existing analog CCTV system to an IP system in a cost effective way.

Gate Automation is another popular and highly demanded product. Thanks to our partnership with BENINCA, we offer swinging and/or sliding automated gate solutions, garage doors, barriers or parking locks. Our experienced sales staff will recommend the right solution based on your requirements. To complement the gate automation market, we also provide door entry systems (intercom/video interphone) from AUTA for domestic, residential complexes and apartments.

The security solutions department also supply and installs fire detection alarm systems from KENTEC and a full range of access control solutions ranging from card system to fingerprint and face recognition systems.

With the increasing market demand for electronic security, we are now focusing on cost effective wireless burglar alarm systems as well as electric fencing solutions for domestic, residential complexes and commercial markets.

Completing the offer, the department supplies back up solutions (Gesan Generators from Spain) and protective equipment (GE & Socomec UPS systems) for both domestic and industrial applications.

Recent successful projects are:

Jeetoo Hospital 1000kVA genset
The water solutions department specializes in the sales and after sales service of water related products such as water pumps, solar water heaters, gas and electric water heaters, hot water boilers, swimming pool and garden equipment, water purifiers and pressure cleaners.

A wide range of well known products from the world most famous manufacturers are commercialized to cater for the domestic, commercial, industrial, and hotel industry requirements; our brands are Davey, Edwards, Like, Nocchi, Comet, Wilo-Emu, Sunrain, Riello, Procopi, KSB-Ajax, SPP Pumps, Ariston and Fiberpool Spa among many others.

A team of experienced sales representatives advises and helps the customers to choose the right product and also ensure that the equipment provided meets their requirements.

The water engineering department benefits from long standing partnerships with suppliers, such as with Davey Pumps for over 30 years. Long-term relationship with our suppliers, availability of spare parts, and efficient after sales service has helped to consolidate the reputation of our department in Mauritius.
Rey & Lenferna Ltd has been serving the construction industry for more than 20 years now. The Contracting Division is a real one stop shop for M&E services. We indeed have many years of working experience in the HVAC, Electrical, Lifts, Public Health & Fire fighting services.

The Division has recently undergone some structural change in order to better serve the industry. With more emphasis on the engineering side with the addition of experienced building services engineers to our team, we are today in a position to offer real turnkey solutions to our valued Clients. Our long lasting business relationships with internationally renowned suppliers allow us to offer quality products and services to our customers.

With a workforce of more than 250 employees, the Contracting Division is one of the major players on the local market. We have surrounded ourselves with experienced people, some of which have proven international experience. Our strong relationships with international recruiting agents provides us with the possibility of staffing our projects with expatriates up to contract management level. However, all staff operate in our well defined structure to provide the Client with the required Quality on Time. Quality has in fact been an area where we invested considerable resources in the last couple of years. This has triggered a real turnaround in our various activities both on and off site.

The Contracting Division also operates overseas mainly in the Seychelles where we have been involved in prestigious projects. This exposure with international consultants and contractors have also helped us improve our systems. We believe in continuous improvement and we have once more set ourselves high targets to achieve. We want to be your reliable partner for M&E services.

Nishal Kona Herkanaidu
General Manager
Air Conditioning & Ventilation

Through our partnerships with world class brands such as Trane, Midea, and Stulz the department provides competitive tailor made solutions for large scale air conditioning and ventilation projects. Our services range from design to complete installation.

Rey and Lenferna understands the dynamics and intricacies of different industries and has the expertise to provide optimal solutions for industry specific requirements. We have specialized solutions for Banks, Builders, Educational Institutions, Hospitals, Hotels, Industrial Applications, IT, Malls, Offices, Restaurants, Showrooms/ Retail Outlets, Telecom.

Rey & Lenferna Lifts & Escalators Department provides, in partnership with KONE, complete and innovative solutions for the installation, maintenance and modernization of elevators, escalators & auto walks. Elevators, escalators & auto walks help people move, make buildings functional and link them with their surroundings. Every day, thousands of people in Mauritius and millions round the world use KONE transportation systems to move efficiently from one place to another. KONE is an expert in people flow management, enabling the efficient flow of goods and people in buildings and other places where access would be difficult without reliable internal transportation systems.

Rey & Lenferna Lifts & Escalators Department offers vertical transportation solutions according to the purpose of the building. The main segments are categorized as residential, office & retail, as well as public transportation and airports. In addition, Rey & Lenferna also serves hospitals, leisure centers, hotels and industrial properties. Our key customers are builders, building owners, facility managers and developers. Moreover, architects and consultants are key parties in the decision-making process regarding elevators and escalators.

Rey & Lenferna Contracting Division designs and implements projects for: Public Health, Fire Fighting (incl. Fire Suppression), Turf Irrigation & Swimming Pools. Our scope of supplies varies from small units to large complete systems.

The department works in close relation with the electrical and air conditioning departments putting Rey & Lenferna in a position to be able to offer complete M & E services.

For public health and fire fighting we supply according to the design specified and propose designs for clients wishing turnkey solutions. We have extensive experience in hot water as well as cold water supply for hotels and apartment complexes.

With respect to turf and landscape irrigation we work with our partner Controlled Irrigation from South Africa to provide the most cost effective designs with quality products from Nelson Turf (USA).

Contracting Division
Email: contracting@reylenferna.com
Rey & Lenferna Automotive was created in 1950's and has a specialized division covering all parts, batteries, lubricants, and diesel services for the automotive industry.

The Automotive division is above all a team of persons with a great ethical and experience background, outgoing and always ready to give the best of themselves. This team is available to you and prepared to solve all your requirements.

We are very selective in choosing our personnel as well as suppliers. Therefore, it is able to assure its customers of an outstanding quality of its services.

The Automotive division in a few figures:

- Over 50 persons from our staff are made available to assist you.
- Close to 300 customers & resellers.
- More than 50 years of activity.
- More than 20,000 battery units sold in 2011.
- Yearly sales in Mauritius exceeding 130,000,000 Rupees.
The automotive department started its operations more than 40 years ago. Our current principal activity is the commercialization of a wide range of prestigious automotive brands through a large resellers network across the island.

We supply:
- TRW & Delphi braking steering & suspension, shock absorbers
- Delphi braking, shock absorbers, steering & suspension, water pumps, diagnosis equipment
- AE belts & timing belts
- Lucas wiper blades, bulbs
- SNR automotive bearings
- Bosch oil, air, fuel filters & cabin filters
- Clean oil, air, fuel filters & cabin filters
- Hardex car care products
- Champion motor oil & greases
- Champion spark plugs & heater plugs
For over 60 years, Rey & Lenferna has been in the battery business. The department supplies:

- Starter Batteries (S L I ) for Vehicles & off road applications
- Stationary Batteries (V R L A) for UPS/Telecom/Alarm Systems etc
- Traction Batteries (Motive Power) for Electric Forklifts/Stackers/Reach Trucks etc
- Deep Cycle (Flooded) for Golf Cars & Marine applications
- Plante Batteries for Sub Stations
- Solar Batteries/Remote Areas/Domestic Applications
- Chargers & Testers/Automotive & Industrial
- Electrolyte & De-ionized Water

We market Lucas, Exide & Fulmen starter batteries to give the best value for money to our customers. The three brands have one thing in common: lasting performance! Today thanks to our foreign partners, our showroom at Bell Village, and the resellers throughout the island, we are the leader in the automotive battery market.

Our batteries are not only used by forklift operators, motorcycles, trucks & lorries, and tractors. Recently we installed over 110 Plante batteries and associated chargers in a power station. We also offer GnB (from Germany) and Exide (from India) motive power batteries & chargers for electric forklifts, US Batteries (from the USA) for deep cycle golf cart batteries, and valve regulated lead acid Sonnenstein batteries (from Germany) for Telecom & solar applications.
Diesel Diagnostic

The Diesel Diagnostic department is specialized in the repairs of diesel fuel injection pumps for all diesel engines, such as double cabs, buses, trucks standby generators, marine engines and agricultural machinery. We are equipped with fully computerised Hartridge and Bosch test benches, which contribute to provide precise settings and is time saving. These test benches are essential for the calibration of the new type of pumps that are running on diesel engines today, such as Bosch VP pumps & all makes common rail pumps & injectors.

We represent Delphi, Stanadyne & Hartridge products in Mauritius. They supply us with genuine parts and equipment to provide our customers the best quality service available. Our qualified technicians, some of which have been with us for over 30 years are up to date with the latest technology and attend training courses at least once a year. We also have a diagnostic centre on our premises at Bell Village. We inspect client vehicles before either doing the complete servicing or removing the fuel pump and Injectors for further repairs in our workshop.

Our aim is to satisfy our clients with what we do best. This will help gain on fuel consumption and engine power. Let’s protect our environment.

Automotive Division
Email: dieseldiag@reylenferna.com

Our Expertise

The strength of our after sales service is built on the expertise of our personnel, who undergo continuous training both at our suppliers’ end and in-house. Thus, allowing us to respond to the needs of our customers. Our workshops are fully equipped with the latest tools and technology equipment to handle any repair in the shortest possible time.
Our Team

Our team comprises of 69 staff out of which are 46 fully qualified technicians, 5 engineers, 6 experienced supervisors and managers and 12 back-office staff. Backed by a range of service tools and equipment, the division has a fleet of 19 service vehicles. Our helpdesk channels each equipment repair, maintenance, and diagnosis or inspection request to respective unit.
We supply turnkey solutions, from the kitchen plan and drawings to the full selection, implementation and commissioning of the chosen equipment. Our technicians carry out installation, repairs and maintenance on hot and cold equipment, bakery / pastry and laundry equipment.

We are present in different segments of the market namely Hotels, Restaurants, Fast Foods, Health Services, Medical Institutions, Banks and Government Institutions.

The team members, most of them with an average of at least 10 years of experience undergo regular training to enhanced their “Savoir-Faire”.

We also propose maintenance contracts, which ensure a lower operating cost and increase the equipment service lifetime. The contracts are tailor-made to fulfil the need of our customers. This service is always coupled with 24h/7 days emergency response service aiming at “Fix it right the fist time”
